

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-29 (Canceled).

Claim 30 (Currently Amended): An information storage medium comprising:

an audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track, and

a management area configured to store management information with respect to the track of said audio information, said management area including program chain information configured to control a reproduction sequence of said audio information, ~~and~~ said program chain information including program information configured to manage said tune or music, said program information including representative picture information, and said representative picture information including entry number information configured to describe an entry number of a still picture object in which a representative picture for the track exists.

Claims 31-35 (Canceled).

Claim 36 (New): A method of recording audio information on a medium which comprises an audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track, and a management area configured to store management information with respect to the track of said audio information, said management area including program chain information configured to control a reproduction sequence of said audio information, said program chain information including program information configured to manage said tune or music, said program information including representative picture information, and said representative picture information including entry

number information configured to describe an entry number of a still picture object in which a representative picture for the track exists, said method comprising:

recording the audio information in the recording area; and

recording the management information including said related information and said cell information in the management area.

Claim 37 (New): A method of reproducing audio information from a medium which comprises an audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track, and a management area configured to store management information with respect to the track of said audio information, said management area including program chain information configured to control a reproduction sequence of said audio information, said program chain information including program information configured to manage said tune or music, said program information including representative picture information, and said representative picture information including entry number information configured to describe an entry number of a still picture object in which a representative picture for the track exists, said method comprising:

reproducing the management information including said related information and said cell information from the management area; and

reproducing the audio information from the recording area.

Claim 38 (New): An apparatus for recording audio information on a medium which comprises an audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track, and a management area configured to store management information with respect to the track of said audio information, said management area including program chain information configured to control a reproduction

sequence of said audio information, said program chain information including program information configured to manage said tune or music, said program information including representative picture information, and said representative picture information including entry number information configured to describe an entry number of a still picture object in which a representative picture for the track exists, said apparatus comprising:

a first block configured to record the audio information in the recording area; and

a second block configured to record the management information including said related information and said cell information in the management area.

Claim 39 (New): An apparatus for reproducing audio information from a medium which comprises an audio recording area configured to store audio information of one or more tunes or one or more pieces of music in unit of a given track, and a management area configured to store management information with respect to the track of said audio information, said management area including program chain information configured to control a reproduction sequence of said audio information, said program chain information including program information configured to manage said tune or music, said program information including representative picture information, and said representative picture information including entry number information configured to describe an entry number of a still picture object in which a representative picture for the track exists, said apparatus comprising:

a first unit configured to reproduce the management information including said related information and said cell information from the management area; and

a second unit configured to reproduce the audio information from the recording area.
